

根据想要建立的唯一索引查询出当天需要保留的数据id

```
create temporary table temp_table_20170407 as  
select min(id) as id from news_sens t  
WHERE DATE(news_add_time) = '2017-04-07'  
group by t.hylanda_id, t.news_id, t.news_type, t.company_code;
```

```
SELECT * FROM temp_table_20170407;
```

//删除不在临时表里的数据

```
DELETE FROM news_sens WHERE id NOT IN(SELECT id FROM  
temp_table_20170407) AND DATE(news_add_time) = '2017-04-07';
```

```
SELECT * FROM company_info t WHERE t.company_name = '光大银行';
```

-- 根据想要建立的唯一索引查询出当天需要保留的数据id

```
create temporary table temp_table_20170512_601818 as  
select min(id) as id from news_company t  
WHERE news_insert_time > '2017-05-12 13:00:00' AND news_insert_time <  
'2017-05-12 14:30:00' AND company_code = '601818'  
group by t.hylanda_id, t.company_code;
```

-- 删除不在临时表里的数据

```
DELETE FROM news_company WHERE id NOT IN(SELECT id FROM
```

temp_table_20170512_601818)

AND news_insert_time > '2017-05-12 13:00:00' AND news_insert_time <
'2017-05-12 14:30:00' AND company_code = '601818';
